

Auditor 128

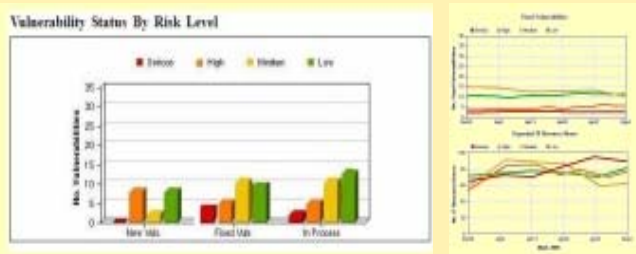

PREEMPTIVE: NETWORK ASSET CVE[®] AUDITING

Audit your network before a hacker does. Generate your own IT Gap Analysis and Regulatory Compliance reports — for finance, healthcare, and commercial retail. Show due care and due diligence.

PROACTIVE: WORKFLOW AND REMEDIATION

Schedule remediation, track your progress. Determine time to closure and cost of resource allocation.

PROTECTION: VULNERABILITY QUARANTINE SYSTEM

Automatically quarantine systems—without ever having to install and manage a client or agent on each:

- Malicious insiders
- Weak or untrusted assets
- Rogue wireless devices
- Dirty laptops

A one-of-a-kind patented solution, VQS[™] uses your existing firewalls and smart switches to create a safer network. Buys you critical remediation time.

Includes built-in cell phone and pager (SMS) alerting.

INTRODUCING Auditor[™] 128 VERSION 4.0:

- Security network auditing appliance.
- Certified to find Common Vulnerabilities and Exposures (CVEs[®]) — the root cause of network downtime. All hackers, viruses, and worms use CVEs[®] to break into your network, behind your firewall.
- Powerful new workflow and remediation system.
- Cost effective self assessment for regulatory IT gap analysis reporting for VISA/MasterCard PCI, GLBA, HIPAA, CFR21-FDA-11, SOX-404, EO13231, and DoD CVE compliance auditing.
- New VISA/MasterCard PCI and ISO17799 compliant corporate security policy builders.
- Now includes patent pending clientless Vulnerability Quarantine System (VQS[™]).
- Enhanced reporting engine for IT managers and C-level executives.
- Enhances your existing network security — making your firewalls and smart switches do a better job.
- Built-in automation and alerting around threats and weaknesses of your network assets — beyond what an IDS or IPS can do for you.

VQS BLOCKS PORTS & PROBLEMS, NOT PEOPLE & PRODUCTIVITY.

Auditor 128

Auditor™ APPLIANCE SOFTWARE:

CVE® compatible auditing system audits your entire network from behind your firewall.

Certified by MITRE, the organization funded by the Department of Homeland Security to standardize the known weaknesses — Common Vulnerabilities and Exposures (CVEs®) — that hackers, viruses, and worms take advantage of.

Tests your entire network from top to bottom, finding all network assets.

Provides a calendar/schedule of continuous auditing.

Built-in audit wizard helps set up audits — from simple audit to complex — in a matter of minutes.

Flags Wireless systems automatically so you can identify rogue wireless devices.

Includes powerful PDF® reporting engine, built-in database/query tool for generating custom reports.

New workflow engine tracks remediation progress with the click of a button.

Built-in asset tracker/inventory alerting system tracks your network assets, contacting you about systems offline/missing, vulnerable, quarantined.

Built-in cell phone and pager (SMS) alerting.

The Clientless Vulnerability Quarantine System (VQS™) engine works with most major firewalls, VPNs, IPS, and smart switches, including:

- Cisco PIX Firewalls
- Cisco Catalyst Smart Switches
- Check Point Firewalls
- CyberGuard SG Series
- CyberGuard Classic Series
- Juniper Networks NetScreen Firewall/VPN
- SecureComputing SideWinder G2

If you have another firewall, VPN, IPS or smart switch that you would like to see integrated with our VQS™, please send an e-mail to support@netclarity.net.

**VQS BLOCKS PORTS & PROBLEMS,
NOT PEOPLE & PRODUCTIVITY.**

Auditor™ 128 APPLIANCE HARDWARE:

- VIA Eden 1 GHz processor.
- 512 MB on board high speed memory.
- 20 GB microdrive for storage.
- Built-in keyboard, video, mouse, and serial ports for initial setup.
- Internal 10/100-baseT Ethernet controller.
- For small to medium networks or subnets of up to 256 IP addresses

Dimensions: 8.6"W x 8.6"D x 2.4"H (225 x 225 x 63 mm).

NOT a critical inline device — you can install it virtually anywhere you like on your network.

Turnkey, rapid results:

- Plug it in, turn it on.
- Connect to it using a standard web browser/HTTPS (SSL).
- Log in, find your network assets.
- Schedule your audits.
- Set up the workflow and vulnerability quarantine systems.

Up and running, productive within half an hour.
