

Awarded Five Stars:

Auditor Enterprise

"Beginning from the superb documentation and ending with the high value for the money, this product shines."
SCMagazine - Group Test - Vulnerability Management - February 2006

ABOUT DIRECT FEDERAL CREDIT UNION:

Direct Federal is a federally chartered financial institution assisting its members whether they want to do their banking online, by phone, by mail or in person, they make sure the applications and systems are easy to use and respond quickly.

CHALLENGE:

Direct Federal Credit Union wanted to take a more proactive approach to National Credit Union Association guidelines for Network Security best practices and regulatory compliance. Their privacy and security programs are regulated and reviewed by the NCUA and they also ensure the privacy of your information by employing secure systems. Direct Federal takes customer security and privacy very seriously and always goes the extra step to protect private information and assets.

SOLUTION:

Direct Federal chose to deploy an **Auditor Enterprise** appliance throughout our network as an additional layer of security. Although we yearly employ third-party vulnerability assessments it was important for Direct to understand where potential vulnerabilities exist in a timely manner to ensure the integrity of our network. Direct Federal proudly maintains physical, electronic, and procedural safeguards that comply with federal regulations to guard our members' non-public personal information.

BENEFITS:

Regularly scheduled audits and automated reporting help them tune their network, protect their customers and supply Direct Federal with a preemptive overview of their system.

"NetClarity's Auditor Enterprise was the preventative medicine needed by Direct Federal considering the many ways a valued customer is able to access Direct Federal's network through our online banking services, our concern lies with protecting those access points and secure customer information from hackers and malicious outsiders.. Our investment has proven to be a success."
